NARRATIVE REPORT

☐ INTERIM☒ FINAL

The prototype console was delivered and accepted. The manuals were also received and accepted. All Government equipment and deliverable items under the contract have been received.

The overall performance of the Contractor was average. In the beginning of the contract, the contractor discovered he forgot to include an item in his costing thereby overrunning the contract. Delays in the delivery of the DIG equipment caused a delay in the contract. When the prototype was delivered, the contractor's engineer shorted some of the circuits requiring an extensive period of trouble shooting and repairing. The Contractor assumed the costs of these repairs and finally delivered the prototype. The prototype was demonstrated successfully a week later. The console is satisfactory and displays good design and workmanship. The Contractor worked well with the Government technical office. The overall rating of the Contractor is, therefore, average.

I certify that all deliverable items under the contract have been delivered.

NARRATIVE REPORT

☒ INTERIM☐ FINAL

The console was delivered to NPIC (again) on 12 May 1969. In checking the equipment out, however, it was discovered that the console was sending an extended start pulse to the computer which the computer did not recognize. The problem is presently being worked on [ ] and it is hoped that the check-out can be continued next week. After the console is considered operational, the wiring diagram will be updated to reflect any changes and then these will be delivered to NPIC along with the maintenance manuals. The special tools were delivered to NPIC on the 22nd of May.

☒ INTERIM☐ FINAL

X1

The Prototype Digitized Measuring Light Table and Console were received from the contractor, but a series of malfunctions required that the D16 reading heads be returned to the manufacturer, then two sets of cables were returned, and finally [ ] took the console back for repairs. We have received the new reading heads and new cables and it is hoped that the console will be brought back in a week or so. Acceptance testing will begin then.

NARRATIVE REPORT

☒ INTERIM

☐ FINAL

X1 1. The [ ] table was built and delivered to [ ] on 26 July 25  
X1 1963. The Dig Heads and Scales had previously been given to [ ] and 25  
[ ] mounted them on their light table. [ ] was supposed to have 25  
finished with the control console by the time [ ] delivered the light 25  
table, but they were not.

X1 2. One of the Dig reading heads was found defective and returned to  
[ ] for repair. At the same time [ ] found errors in the logic of the console.  
Debugging began in July and has just been completed. This seems to be an excessive  
time period for debugging, but I feel that indeed they have been debugging since  
then and that they may have expended some of their own money in completing  
X1 this project. Several integrated circuits were defective and several other  
problems were encountered [ ]

X1 3. I feel that if the designs, and fabrication were good in the beginning,  
the light table and console would have been here months ago. At the same time,  
X1 I think [ ] also recognizes this and is rectifying the mistakes at  
[ ] expense in terms of money, but the Government's expense in terms of time.  
Fortunately, time is not critical on this project.

4. The table and console were delivered to NPIC on 26 September and  
acceptance testing is starting.
